

Crooked River District Klondike

Great Trail Council, BSA.

# CROOKED RIVER DISTRICT KLONDIKE 2022

## Search for the Klondhog

**January 21-22, 2022  
Camp Butler**

## Klondike 2022

There has been a quiet murmur echoing across the depths of Camp Butler and the Manatoc Scout reservation, of a mythical creature all but forgotten for generations. Like the lore of the Yeti, Loch Ness Monster or Bigfoot, this creature is seldom seen, but its presence has endured. The mythical Klondhog may be rearing its head to return to the hills of Camp Butler.

Do the Scouts of the Crooked River District have what it takes to find this elusive being? It will take all their cunning, and scout skills to seek this creature in the 2022 Klondike, **the search for the Klondhog.**

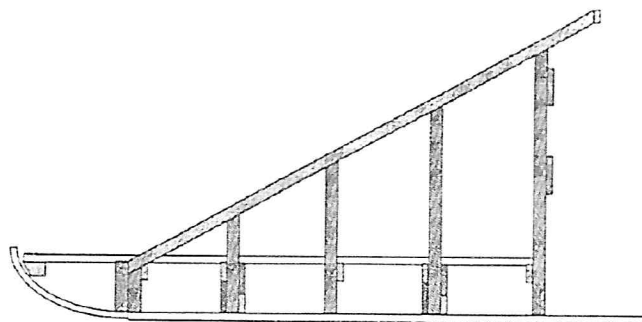

### Important things for this year:

- You may invite Webelos to participate with the troop during the day on Saturday.
- Scouts will be expected to practice the patrol method.
- Skills which may be worth practicing prior to the event:
  - Cold weather & basic first aid
  - Orienteering
  - Fire building
  - Basic knots
  - Patrol method

## Sleds

There is no **exact** sled design that will be required, only a few specifications.

Klondike Sled Specifications	
Length	5' to 6.5'
Width	1.5' to 2'
Support Materials	Screws, Nails, Rope, Twine, Glue, Skis are all allowed
Any additional support materials and accessories can be used as well, provided that above requirements are met.	
<b>Most of all, have fun and be creative!</b>	

**\*\* Patrols without appropriate sleds will still be able to participate, but may miss points in sled inspection and in the Saturday afternoon competition.**

# Klondike 2022

## Patrol Needs

It is essential for all patrol sleds to contain each of the following items to fairly compete in the events, and to be prepared for the winter weather and whatever may come up during Klondike.

1. **Patrol Sleds:** Sled must follow basic construction guidelines, but may then contain whatever you want to add to them. Just remember whatever you add, you carry with you all day. Have fun, it's your sled!

2. **Sleds must have on them the following gear, stored in a container or pack, quickly accessible:**

- Pens or Pencils
- Paper
- Scouts BSA Handbook
- Watch or device to keep time
- Orienteering Compass
- At least 50' of cord or rope
- Patrol Flag
- First Aid Kit
- Shelter material
- Protection for hypothermia victim
- Camp Map
- Fire building materials
- Water for each patrol member
- Daypacks

**As suitable snow is not guaranteed, patrols should have the flexibility and preparedness to be able to carry all the above equipment in either their sleds, or in daypacks. Ideally they will pack all equipment into the daypacks and pack the daypacks onto the sleds. (School backpacks work fine for daypacks)**

3. **Scouts must have:**

- Proper Winter Clothing
- Gloves
- Head Covering
- Boots or other winter foot gear (NO tennis shoes)
- Water Bottle
